1. The following is an examiner's statement of reasons for allowance:

The subject matter of the claims is allowable over the prior art of record because all prior arts fail to either teach or suggest a method or a system for analyzing compatibility of access terminals for simultaneous communication at a high data rate, by accepting first array response vector information associated with a first access terminal; accepting second array response vector information associated with a second access terminal; and calculating a first compatibility coefficient result as a function of a product of the first array response vector information and a conjugate of the second array response vector information.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
